About Me

IT Operations and Infrastructure professional with over five years of experience in **system administration, network engineering, enterprise technical support,** and multi-site infrastructure management. Experienced in leading **24/7 IT operations,** coordinating support teams, and maintaining service reliability across business units.

Hands-on in **BGP routing, VLAN segmentation, firewall high availability, Proxmox VE, Active Directory,** and security monitoring with **Zabbix, Grafana, Wazuh, ELK Stack,** and **CrowdStrike.** Implemented **ITSM/ITAM** platforms and operational tools to improve monitoring, asset visibility, documentation, and workflow efficiency, while supporting **PCI DSS** and **ISO 27001** initiatives.

Currently working as an **L2 Support Engineer** focused on **CyberArk Privileged Access Management (PAM),** including **PSM, HTML5 Gateway, Remote Access,** and **Privilege Cloud,** with hands-on configuration and troubleshooting experience in technical lab environments.

Skills & Competency

- IT Operations & Technical Support
- Network Troubleshooting & Optimization
- ITSM & ITAM
- SOP & Documentation Development
- Team Collaboration & Communication
- System Administration & Infrastructure
- Security Compliance
- Monitoring & Observability
- Multi-Vendor Device Implementation
- Google Workspace

Language

Bahasa Indonesia (Native)
English (Professional Working Proficiency)

Experience

Solugenix Corporation
Jakarta, Indonesia

L2 Support Engineer - CyberArk PAM (August 2026 - Present)

Track record & experience

- Support **Level 2 technical operations** for **CyberArk PAM** solutions, focusing on **PSM, HTML5 Gateway, Remote Access,** and **Privilege Cloud.**
- Configure, deploy, and troubleshoot **CyberArk PAM** components, including **Digital Vault, PVWA, CPM, PSM, PSMP,** and connector infrastructure in lab environments.
- Analyze **privileged session connectivity, authentication,** and configuration issues through **log analysis** and technical diagnostics.
- Support **technical case management** through diagnostic data collection, issue documentation, and escalation coordination.
- Contribute to **customer-facing technical support workflows,** including issue updates, troubleshooting guidance, and resolution follow-ups.

PT ATI Business Group
Jakarta, Indonesia

IT Operations Supervisor (March 2024 - August 2026)

Track record & experience

- Oversaw day-to-day IT operations and infrastructure support for **500+ users** across multiple business units, maintaining service availability, operational stability, and compliance readiness.
- Architected and deployed enterprise monitoring platforms using **Zabbix**, **Grafana**, and **Uptime Kuma** on on-premise servers, covering OS provisioning, hardening, tuning, and alerting.
- Implemented a **Proxmox VE** virtualization cluster to improve server consolidation, availability, and recovery readiness.
- Maintained **Active Directory** and **WSUS**, including authentication services, Group Policy management, and patch governance.
- Integrated **Wazuh**, **ELK Stack**, and **CrowdStrike** to strengthen centralized logging, security visibility, and incident handling.
- Delivered multisite infrastructure and network security initiatives, including:
  - Multi-site **BGP routing** across 7 sites for resilient failover and redundancy
  - **VLAN** and **DMZ segmentation** for security isolation and traffic control
  - **LAN**, **WAN**, and **DMZ firewall implementation** with HA design
  - Cross-vendor integration across **MikroTik**, **Sophos**, and **Ubiquiti** with load balancing and failover
- Rolled out **ITSM and ITAM** platforms such as **iTop**, **GLPI**, and **Snipe-IT** to improve SLA control, asset visibility, and workflow management.
- Designed and enhanced internal operational applications, including **SHIFT**, **CHECKLIST**, and **ATLAS**, to support shift operations, daily control activities, operational visibility, and semi-automated IT Operations workflows.
- Managed **Thecus NAS** storage for departmental backup, access control, and retention requirements.
- Deployed **Wi-Fi mesh** infrastructure across multiple sites to improve enterprise connectivity and coverage.
- Produced **SOPs**, technical procedures, and audit-ready documentation supporting **PCI DSS** and **ISO 27001** initiatives.
- Oversaw workload allocation, **24/7 shift planning**, and cross-functional coordination.

PT ATI Business Group
Jakarta, Indonesia

IT Operations Staff (October 2022 - March 2024)

Track record & experience

- Served as System Administrator for **WSUS** and email domain management across the company.
- Provided end-user IT support, including troubleshooting hardware, software, and connectivity issues.
- Maintained and documented internal IT asset inventory, ensuring accurate and current records.
- Resolved issues related to enterprise software implementation and internal system updates.
- Monitored and maintained internal **CCTV** systems, including configuration and troubleshooting.
- Administered network infrastructure across **MikroTik**, **Sophos**, and **Ubiquiti** environments.
- Oversaw internal server performance and network traffic as PIC for both system and network operations.

PT Mandiangin Batubara (Thriveni Group)

South Sumatra, Indonesia

IT Support Specialist (April 2022 - October 2022)

Track record & experience

- Set up and configured communication radios (**HT** and **rig**), primarily **Motorola** devices.
- Acted as PIC for internal platforms including **AMTISS**, **SAM-IT**, and **cloud.thriveni.co.id**.
- Performed maintenance and troubleshooting for end-user IT issues.
- Maintained internal IT asset documentation.
- Installed, configured, maintained, and troubleshot the company local network.
- Installed, configured, maintained, and troubleshot internal **CCTV** systems.
- Monitored traffic and served as PIC for internal server operations covering both network and system domains.

PT Hokkan Deltapack Industry

Banyuasin, Indonesia

IT Support Plant (February 2022 - April 2022)

Track record & experience

- Maintained **QNAP NAS** infrastructure and plant end-user devices.
- Connected and configured IT-related devices including printers, PCs, and fingerprint devices.
- Supported IoT-related project planning and utility software optimization.
- Provided user guidance for internal utility software used within the company.

PT Telemedia Prima Nusantara

Palembang, Indonesia

Network Engineer & NOC (March 2021 - February 2022)

Track record & experience

- Delivered local network reconstruction, deployment, and maintenance across government, healthcare, enterprise, and residential environments in South Sumatra.
- Implemented internet, broadband, and dedicated connectivity projects for client sites, including hospitals, offices, and private sector locations.
- Performed wireless **PTP**, **POP wireless**, **LTE**, and **fiber optic** installation and configuration for multiple field deployments.
- Supported backbone, **DNS**, routing, and infrastructure optimization for internal and client networks.
- Built operational automation and notification solutions, including a **Telegram bot** and automatic tunnel routing for network operations.
- Handled FTTH planning, mapping, and deployment activities, including Green Center Park Residence and other residential coverage areas.
- Executed CCTV fiber optic wiring and related network implementation activities for public sector environments.

Palembang, Indonesia

PT Angkasa Pura II

Internship (June 2018 - August 2018)

Track record & experience

- Completed system project support for a parking area environment at **PT Angkasa Pura II** and assisted with flight traffic monitoring activities.

Organization

BEM FASILKOM UNSRI 2018
Vice Leader (2018)

ASMAPAL (Aspirasi Mahasiswa Palembang) UNSRI 2018
Member of Public Relation (2018)

BEM FASILKOM UNSRI 2017
