Professional Profile

IT Operations professional with experience spanning ISP and field network engineering, enterprise infrastructure, operational supervision, and compliance support. Supported 500+ users, delivered BGP routing across 7 sites, and coordinated 24/7 operations. Hands-on with monitoring, virtualization, Windows administration, ITSM/ITAM, and internal workflow systems.

Core Capabilities

Infrastructure & systems: Proxmox VE, Windows Server, Active Directory, WSUS, NAS

Networks & resilience: MikroTik, Sophos, Ubiquiti, BGP, VLAN / DMZ, FTTH

Observability & security: Zabbix, Grafana, Uptime Kuma, Wazuh, ELK, CrowdStrike

Operations & governance: GLPI, iTop, Snipe-IT, PCI DSS, ISO 27001, SOPs

Professional Experience

IT Operations Supervisor | PT ATI Business Group

MAR 2024 - AUG 2026 | Jakarta

Operations & team coordination

- Oversaw day-to-day IT operations and infrastructure support for 500+ users across multiple business units, including workload allocation, 24/7 shift planning, and cross-functional coordination.
- Rolled out iTop, GLPI, and Snipe-IT to support SLA control, asset visibility, service workflows, and inventory administration.
- Designed and enhanced SHIFT, CHECKLIST, and ATLAS for shift handovers, recurring controls, task ownership, and semi-automated operational workflows.

Systems, monitoring & security

- Architected and deployed Zabbix, Grafana, and Uptime Kuma on on-premise servers, covering OS provisioning, server hardening, performance tuning, and alerting.
- Implemented a Proxmox VE cluster for server consolidation, availability, and recovery readiness.
- Maintained Active Directory, authentication services, Group Policy, and WSUS patch governance.
- Integrated Wazuh, ELK Stack, and CrowdStrike for centralized logging, security visibility, and incident handling.
- Managed Thecus NAS for departmental backups, access control, and retention requirements.

Network delivery & resilience

- Delivered BGP routing across 7 sites for failover and redundancy, with VLAN and DMZ segmentation for isolation and traffic control.
- Implemented LAN, WAN, and DMZ firewall zoning with HA design; integrated MikroTik, Sophos, and Ubiquiti for load balancing and failover.
- Deployed Wi-Fi mesh infrastructure across multiple sites to extend enterprise connectivity and coverage.

Governance & audit support

- Produced SOPs, technical procedures, controlled documents, and audit-ready evidence supporting PCI DSS and ISO/IEC 27001:2022.
- Coordinated PCI DSS SAQ activities in 2024 and 2025, including evidence mapping, technical walkthroughs, remediation follow-up, and re-validation.
- Represented IT Operations as an operational risk owner and performed assigned cross-department internal audits, including corrective-action and closure follow-up. Scope did not include external certification auditing or ISMS steering-committee membership.

IT Operations Staff | PT ATI Business Group

OCT 2022 - MAR 2024 | Jakarta

Systems & end-user support

- Served as system administrator for WSUS and company email domains.
- Troubleshoot hardware, software, and connectivity issues for end users.
- Resolved enterprise-software implementation issues and supported internal system updates.
- Maintained and documented internal IT asset inventory with current ownership and device records.

Network & infrastructure operations

- Administered network infrastructure across MikroTik, Sophos, and Ubiquiti environments.
- Monitored internal server performance and network traffic as the operational PIC for systems and networks.
- Configured, monitored, and troubleshoot internal CCTV systems.

IT Support Specialist | PT Mandiangin Batubara

APR 2022 - OCT 2022 | South Sumatra

Site communications & applications

- Set up and configured handheld and rig communication radios, primarily Motorola devices.
- Acted as PIC for AMTISS, SAM-IT, and the internal Thriveni cloud platform.
- Performed end-user maintenance and troubleshooting while maintaining internal IT asset documentation.

Local infrastructure & controls

- Installed, configured, maintained, and troubleshoot the local network and internal CCTV systems.
- Monitored traffic and served as PIC for internal servers across both system and network operations.
- Supported ISO 27001 documentation and technical implementation within a server-room-only scope, not as a member of the ISMS team.

IT Support Plant | PT Hokkan Deltapack Industry

FEB 2022 - APR 2022 | Banyuasin

Plant technology support

- Maintained QNAP NAS infrastructure and plant end-user devices.
- Connected and configured PCs, printers, and fingerprint attendance devices.
- Supported IoT-related project planning and optimization of utility software.
- Provided user guidance for internal utility software used by plant personnel.

Network Engineer & NOC | PT Telemedia Prima Nusantara

MAR 2021 - FEB 2022 | Palembang

Client networks & ISP operations

- Reconstructed, deployed, and maintained local networks for government, healthcare, enterprise, and residential clients in South Sumatra.
- Delivered broadband and dedicated internet connectivity for hospitals, offices, and private-sector sites.
- Configured MikroTik routing, VLAN/DHCP segmentation, bandwidth visibility, dual-ISP failover, and site-to-site connectivity; supported backbone and DNS optimization.
- Built Telegram operational alerts and MikroTik Netwatch/L2TP routing automation to improve incident visibility and tunnel continuity.

Wireless & fiber field delivery

- Planned PTP/PTMP wireless links, assessed distance and antenna heights, surveyed frequencies, and installed, configured, and aligned radios for client and POP deployments.
- Performed LTE and fiber-optic installations alongside wireless deployments in city and remote-site environments.
- Mapped FTTH coverage and cable routes using field surveys, drone documentation, and Google Earth Pro; planned junction boxes, ODC, and ODP locations for residential coverage.
- Executed fiber-optic wiring and maintenance for public-sector, residential, and broadband client sites, including CCTV network connectivity.
- Installed and configured OLT/ONT access equipment and supported PPPoE-based subscriber connectivity.

IT Internship | PT Angkasa Pura II

JUN 2018 - AUG 2018 | Palembang

Internship scope

- Supported a system project for the airport parking-area environment.
- Assisted with flight traffic monitoring activities in an operational airport environment.

Selected Work

ATLAS: Self-hosted asset tracking and lifecycle administration. Next.js, Fastify, PostgreSQL, Docker.
github.com/rickopra/ATLAS

SHIFT & CHECKLIST: Internal shift handover and recurring operational-control workspaces.

CyberArk L2 Rolebook: Independent learning and operational-runbook project. Not a certification or employment claim. rickopra.github.io/cyberark-l2-rolebook

Education & Languages

Informatics Engineering, Sriwijaya University. Degree not completed.

Indonesian (native) / English (professional working proficiency)
